You have ceramic brake discs - we have the solution

Your ceramic brake discs are already worn and they need to be replaced – you don't want to consume your new original ceramic brake discs – you want to have a much faster Lap Time with much more Braking power - the problem recognize and solve
The perfect "plug and play" solution and that without any modification, is called HTCIC – outstanding brake technology advantages o-brake.com

Professional tip: "Dose the braking point late, precise and short - so you leave your opponents behind"

o-brake.com exclusive distribution by Schmid Motorsport GmbH

"Change now from Series- to our HTCIC Brake discs and feel the ultimate braking performance!"

The original brake discs are replaced with the "o-brake.com" HTCIC high performance brake discs by easy "plug and play" mounting- which we are happy to offer and is available at any specialist workshop. Compared to the conventional gray cast iron brake discs- the highly durable HTCIC (High Tech Cast Iron Carbon) material is revolutionary- even ceramic brake discs are outperformed (responding qualities are present in both cold and hot condition). Further essential advantages are: Extremely high fading level- highest thermal stability possible- precise modulation as well as an affordable price.

All our high performance brake parts are compatible with your car's safety features such as ABS- ESP- PSM- etc.

Characteristics "Drilled": street-sport

Drilled brake discs lead off the emerging braking heat faster than undrilled discs because of the high ventilation at the bigger radiation surface.

Characteristics "wet": sport-track

Profiled brake discs disperse the water film from the brake disc surface within fractions of a second and provide a very short response time also in case of pouring rain.

Characteristics "wave": track-race

Lowest weight and maximum deceleration values because of biggest radiation surface and also optimum brake pad cleaning milling make this disc a vantage for motorsport use with varying conditions.

For optimal adaptation to your intended use- you can select the following HTCIC sport brake pads:

- **Street/sport = type HTCIC-black**
- **Sport/racing = type HTCIC-yellow**

Because of the original optics, the accuracy of fit and a quick / easy installation is back to the original parts at any time again possible.

Order No .: M-11888

We are happy to advise you, with over 25 years of technical know-how.
Inform us about your wishes.
